

**2009 Community Bible Church Annual Building Report  
from  
Larry Engbrecht – Chairman**

**At our annual meeting in Jan of 2009 the church voted to go ahead and begin the process of building an expanded sanctuary. That addition with some modifications to the existing building was looked at by an architect in late 2008 and conceptual drawings were made. The drawings are located in the back of the reception area of our church and show what could be a possible solution to going back to two services.**

**When we looked at this proposition we tried to determine seating capacity, parking, modifications to our current sanctuary and then ultimately what will all this cost. The estimate done by our architect was about \$2.3 million with a turn key building. Obviously there are some items we may want to do and there are items we cannot do to help this cost. But as our meeting in Jan of 2009 we decided to start a building fund and see what the future for funding this expansion would hold.**

**As of calendar year ending in December 2009 we have approximately \$475,000 set aside for this expansion. We as a Board of Elders and as a building committee would like to thank all that have contributed and ask that they continue to give this a priority in their planned giving for 2010. It is our hope that as we near the \$1 million mark we can start the design process to dial in what this new addition would look like and how it would function.**
